The Coming Global Enslavement

The Coming Global Enslavement to Digital Currencies.

Central Bank Digital Currencies are the future of currency and when they arrive they'll enslave the world. Central bank digital currencies (CBDCs) have yet to be launched on a large scale, but advocates envision a government-controlled cryptocurrency that replaces national currencies. As a replacement for paper currency, CBDC will serve as the digital equivalent of paper currency for use as payment and an official unit of account. It will carry its own unique serial number or digital watermark to prevent counterfeiting. Across the world, central banks are openly discussing the introduction of CBDCs. Bitcoin is decentralized. No single authority controls it. In contrast, central banks will operate, regulate, and control CBDCs. This simple distinction is the difference between a Libertarian's dream and every citizen's nightmare. In the future, "you'll own nothing and be happy." So says Klaus Schwab, the Founder of the World Economic Forum. But this begs the question. If you own nothing, who owns eve-

rything? The answer is simple.

They, the world's wealthiest and most powerful, do. They'll make this vision a reality through an event called "the Great Reset". While this vague term covers a number of policy ideas, the heart of the Great Reset is a complete overhaul of the global monetary system. This isn't anything new. It's happened before. Since 1900 alone, we've had four global monetary systems: the gold standard, the gold exchange standard, Bretton Woods, and the U.S. fiat dollar standard. On average, these systems have each lasted around 40 years. We're now in year 50 of the U.S. fiat dollar standard, which means we're overdue for a new global monetary system. In all likelihood, it will feature central bank digital currency at its core. If so, governments will gain unprecedented power over individuals. Under such a system, private bank accounts will disappear. In their place, everyone will have an ac-

count with the central bank. Unlike paper currency, which people can exchange in private, all transactions will take place in a digital ledger. Central bankers will have the ability to view all transactions. Nothing will be private. Before CBDCs can become the standard, paper money needs to be eliminated. The Covid-19 pandemic accelerated the trend toward cashless payments. A major crisis will cause that to happen "overnight". The end of paper currency and its replacement with CBDC will give unlimited power to government leaders. Not only does it offer a way to permanently record every financial transaction, but CBDC will track where you go and what you do. It will track the websites you visit and the friends you interact with. <<>>

The Bible indicates that first the church will be caught away. Then, in the three-and-a-half years before Antichrist is revealed as the global leader, all of the technologies and systems will be perfected for his short world rule. Woe to those who miss the rapture. Prepare now! Tomorrow could be too late.

A 5th Dimension Of Earth's Core Just Discovered.

A new algorithm has allowed scientists to declare that the earth beneath our feet has a fifth layer, coming closer to the description in Isaiah 14:15. Scientists have described the earth as having four layers: the crust, the mantle, the outer core, and the inner core. A fifth layer has long been suspected but until now there has been no empirical proof. Geologists from the Australian National University created new search algorithms to compare thousands of models of the inner core with travel time data for seismic waves, publishing their results in the *Journal of Geophysical Research*. They found changes in the structure of iron at about 400 miles depth indicating the presence of an extra layer. We found evidence that may indicate a change in the structure of iron. At the heart of the earth is a solid inner core making up just 1% of the earth's volume. The inner core is two-thirds the size of the moon. Made mainly of iron, the inner core reaches temperatures of up to 5,700°C making it as hot as the sun's surface, but the pressure caused by gravity prevents it from becoming liquid. Surrounding this is a 1,242 mile thick layer of molten iron, nickel, and small quantities of other metals. Due to the Coriolis effect caused by the revolution of the planet, the molten metals flow and generates planet-wide magnetic fields.

Science in an Age of Fear. Some believe science is a kind of benevolent deity to be worshiped without questioning. Others have pointed out that science is actually a methodology. There is danger from those who use science for political control over us. They instill, and then continuously magnify fear, which is the most effective instrument of totalitarian control.

7 Plagues That Are Hitting Our Planet Right Now

The chaos will continue to increase as we near the prophesied Tribulation Period.

#1 Millions of Rats in Australia. Millions upon millions of rats are making lives miserable in Australia. In some instances it is literally taking hours to clean up after them. Mice in the cabinets. Mice in the streets. Thousands upon thousands of mice in the barn. Some farmers have already lost entire grain harvests to the rampaging mice, while hotels have had to close because they can't keep the critters out of the rooms. Staff at a grocery store in a small town northwest of Sydney reported catching as many as 600 mice a night.

#2 Large Earthquakes. So far in 2021, we have had seven quakes that are magnitude 7 or greater, and that includes a magnitude 7 earthquake that just shook Japan.

#3 Volcanoes are Roaring to Life all Over the Globe. *Volcano Discovery* reports 29 volcanoes currently erupting, and that includes a volcano in Iceland that had been dormant for hundreds of years.

#4 The "Megadrought" in Southwestern U.S. There was an article this month entitled "You Were Warned That Dust Bowl Conditions Would Return, And Now It Has Happened". NBC News is telling us that there is "little hope for relief" any time soon.

#5 Armies of Locusts in Africa and the Middle East. In 2020, giant armies of locusts the size of cities marched across parts of Africa, the Middle East, and Asia. Millions of farmers had their crops wiped out, and experts told us that it was unlike anything they had ever seen before. That was only supposed to be a one-year

plague, but now it is happening again.

#6 H5N8 Bird Flu In Russia. A mutating strain of bird flu has emerged in Russia with "a high degree of probability" of human-to-human transmission. If it starts spreading widely among humans, the percentage of victims that will die will be far higher than for Covid.

#7 The Covid Pandemic. Even though people are being vaccinated at a feverish pace all over the globe, the number of confirmed cases in Brazil is higher than ever before and experts are telling us that a "fourth wave" has begun in Europe. At this point, more than 2.7 million victims have already died from Covid. We live at a time when everything that can be shaken will be shaken, and what we have experienced so far is just the beginning.

A Disturbing Theme of Idols is Plaguing Israel's Elections. Statues (or idols) are becoming a prominent form of political advertising and protests in Israel and has been going on for several years with at least four in Tuesday's election. One was a statue of

Netanyahu holding two "stone" tablets with "61" repeated ten times thereon. To win the P.M. position they must have a coalition of 61 members of Knesset. While an unknown person placed the statue in Rabin Square, Netanyahu wrote a letter to God asking for a victorious election and prayed at the Wailing Wall.
