Farmers Warn Megadrought in Western U.S. Threatens Devastating Crop Failures.

Throughout U.S. history, there have always been droughts in the western half of the country from time to time, but what we are dealing with now is truly alarming. Scientists tell us that a multi-year "megadrought" has developed in the southwestern portion of the country, and this is the worst year of that "megadrought" so far by a wide margin.

Volcano Eruption in the Caribbean. IsraAID is sending a team of Israeli emergency responders to St. Vincent and the Grenadines, a chain of islands in the Caribbean, where a volcano on the main island has been spewing ash since April 9, endangering lives and homes. More than

20,000 people have been displaced with some 12,000 staying in public shelters since the La Soufrière volcano began erupting, the first time since 1979. Villages are covered in ash, drinking water is hard to find, and crops and livestock have been destroyed, even as the coronavirus pandemic continues to impact the island. The U.N. has started a global fund to help cover the estimated \$29 million that is needed to help residents. (israel365.com 4/25)

Petition In NYC Calls for Parents to Marry Their Children: 'Be Prepared for Earthquakes, Volcanoes' Warns Rabbi.

On April 1, a New York City resident filed a claim in Manhattan federal court seeking to overturn existing laws prohibiting a parent from marrying their grown offspring, a practice referred to as incest. The petition described the couple as being under the classification of "Parent and Adult Child Non-Procreationable" couples. The petitioner requested that all their personal details remain private as their request is "an action that a large segment of society views as morally, socially and biologically repugnant." The petition called the issue a matter of "individual autonomy." The parent gave the reason for the petition. "Through the enduring bond of marriage, two persons, whatever relationship they might otherwise have with one another, can find a greater level of expression, intimacy, and spirituality." Denial would "diminish their humanity." If the court rules in favor of the request, it would overturn the current law under which any form of incestuous sexual relations is a third-degree felony bearing a sentence of up to four years imprisonment. How Much National Debt is Too Much? America May Soon Be at it's Tipping Point.

No one really knows the debt tipping point. But it's worth noting that the US debt-to-GDP ratio--essentially a country's debt compared to its annual economic output--was 129% at the end of 2020. In other words, the official US debt was nearly a third larger than the entire US economy and that is just last year. (prophecynewswatch.com 5/3)

Israel Has No Choice But to Act on Its Own to Stop Iran.

The inescapable conclusion from recent events is that the Israelis

Putin Warns US/NATO Not to Cross

"Red Line".

During his annual State-of-the-Union address on Wednesday, Russian President Vladimir Putin warned western nations not

to interfere with the developing conflict with Ukraine and not to "cross red lines. We really don't want to burn any bridges, but if someone takes our good intentions for indifference or weakness, and if they intend to burn or destroy those bridges themselves, they should know that Russia's response would be asymmetrical, quick and tough," Putin said in his address to top officials and both houses of the Russian parliament. Echoes Of Ezekiel 38 - Israel/Iran Shadow

War Heats Up.

You won't hear the corporate media say very much about the "shadow war" that Israel and Iran are currently engaged in,

German Intelligence: Iran, Syria, Paki-

stan Are Producing Weapons of Mass

Destruction.

This should be well known by all Western leaders and citizens alike, but it's good to see it backed up by an intelligence report. Abbas to Call off Elections, Blame Is-

rael.

Now what seemed most likely is apparently certain: President-For-Life Mahmoud Abbas, now in the sixteenth year of his four-year term as head of the Palestinian Authority, will definitely call off the Palestinian parliamentary election that was to be held on May 22, and the presidential election scheduled for July 30. The reason is simple: all the opinion polls confirm that Abbas' parliamentary candidates would manage to win only 30 of the 132 seats up for grabs, and Abbas would lose the presidential election decisively against a candidate put up by Hamas, or against either of his two rivals. Digital Vaccine Passports are Coming

Whether We Like it or Not.

"Inevitably I think there will be passports because people are eager to go back to a sense of normalcy," said Dr. Mahshid Abir, a senior physician policy researcher for the RAND Corp. "One other potential benefit of requiring a passport to travel, eat out or attend a concert is to pressure some vaccine-hesitant folks into getting their inoculation, Abir said." Florida and South Carolina have refused to participate in this gross violation of civil liberties. But some liberal-controlled states like New York are already implementing the passport scheme. The first-in-the-nation certification, called the

Excelsior Pass, will be used first at large-scale venues like Madison Square Garden. But next week, the pass will be accepted at dozens of events statewide. It already lets people increase the size of a wedding party, or other catered event. (prophecynewswatch.com 4/23)

Is The Stage Being Set For Great Decep-

Something is clearly happening, and I believe that all of the leaks that have been occurring are meant to mentally condition us for further disclosures in the future. The stage is being set for a deception of absolutely epic proportions, and most people will swallow whatever they are told hook, line and sinker. What a convenient explanation for the millions of people who disappear in the rapture.
