## Global Nuclear Threats

In its latest assessment of China's military capabilities, the US Department of Defense estimated China's nuclear weapons stockpile will triple by 2030. (*The Atlantic*, February 16). According to satellite image analysts, "work has accelerated this year on more than 100 suspected missile silos in China's remote western region that could be used to house nuclear-tipped missiles capable of reaching the US" (*Wall Street Journal*, April 9). American military officials and security analysts are concerned China's nuclear acceleration could mean it would be willing to make a surprise nuclear strike." Last week, Russia tested a new intercontinental ballistic missile (ICBM). Speaking of the missile, President Putin noted, "The new complex [weapon] has the highest tactical

and technical characteristics and is capable of overcoming all modern means of anti-missile defense. It has no analogues in the world and won't have for a long time to come" (*Reuters*, April 21). Since the start of 2022, North Korea has also tested short-range, intermediate-range, long-range (including a nuclear-capable ICBM capable of reaching New York), and hypersonic missiles (*BBC*, March 24). It also recently threatened to strike with nuclear weapons if South Korea attacks (*Reuters*, April 5). South Korea, with a new, conservative president, houses US military bases and is again discussing nuclear armament (*France24*, April 14). And Germany recently decided to upgrade its air force with US F-35 nuclear-capable fighters (*Al Jazeera*, March 15). Jesus Christ warned that "rumors

of wars" would precede His return (*Matthew 24:6*). Wars and threats between nations have always been present, but the scale and magnitude of the current military buildups is unprecedented. When nuclear-armed nations issue threats and other nations arm to counter those threats, students of Bible prophecy should take notice. (*twnews&prophecy.com 4/29*) Despite Iran's insistence that its nuclear activity is for peaceful purposes only, former Iranian MP Ali Motahari revealed that Iran "from the very beginning" aimed to make a nuclear bomb and strengthen the deterrent forces, but we could not maintain the secrecy of this issue, and the secret reports were revealed by a group of hypocrites," he said. ### The Currency Reset is Coming. 90% of Nations Planning Digital Currency.

Nine out of ten central banks are exploring central bank digital currencies (CBDCs), and more than half are now developing them or running concrete experiments. The newest of these, Brazil and Namibia, announced their plans only last month. In particular, work on retail CBDCs has moved to more advanced stages. This echoes a March report from the IMF which claimed over one hundred nations are at least in the planning stages of releasing their own CBDC. It seems programs of government-issued digital money have been gaining momentum all around the world since at least 2020, and apparently, now they exist in over half the countries on the planet. As with all globalist agendas, the push for CBDCs is always part of 'the current thing'. First, it was a response to Covid. Then they could help us halt climate change. Then they're a response to the war in Ukraine. Using that method they have moved from a barely-discussed fringe idea to regular mainstream coverage and 90% of the world trying them out, all within the space of a couple of years. # America In Crisis

## America is Running Out of Military Munitions and Can't Replace Them for Years.

Just as Russia has now completed the test firing of its global ICBM "Sarmat" missile system -- which can reach any target anywhere in the world with a dizzying array of re-entry (nuclear) vehicles -- alarm bells are being sounded over America's rapid depletion of munitions due to the Russia-Ukraine conflict. The US Pentagon has shipped thousands of Javelin anti-tank weapons to Ukraine, along with millions of rounds of ammunition, artillery shells, rockets, drones and troop transport vehicles, leading to a sudden drop in the available stockpiles of such equipment should US forces need to defend the homeland. Even worse, we've now learned that many of these systems are extremely difficult to replenish, requiring years of manufacturing to restore supplies. (naturalnews.com 5/2)

## On May 22: WHO Will

Have Authority to Lock Down All of America. "Nimrod wanted a New World Order that didn't have a God in it," Rabbi Winston explained, "A godless world allows people to do what they want without consequences or moral responsibility. Man ordering society as he wants." Officials from the Biden administration are working to give the World Health Organization the power to unilaterally declare a health emergency in any country, thereby giving them emergency powers. The message from the administration and the vote are going unreported by the heritage media, but former Congressman Michele Bachmann is working hard at sounding the alarm. Bachmann has stated that the upcoming vote in Geneva over the Biden Administration's amendments would cede U.S. sovereignty to the WHO over national healthcare decisions in what she described as "the biggest global power grab that we have seen in our lifetimes. The votes on May 22 in the WHO is to ratify the amendments proposed by the Biden admini-

stration and are scheduled as "Provisional agenda item 16.2. "This authority that they will be given will impact 99.4% of all the people in the world," Bachmann said. "There are 193 nations belonging to the UN. The Biden administration is bringing amendments that were proposed that all nations of the earth cede their sovereignty over their national health care decisions to the WHO." "This means that the WHO would have decision-making authority to intervene in the United States government policy and any nation of the world without our permission. For instance, the lockdown where you see 26 million people today locked down in Shanghai, China. They can't leave their apartments or homes. The WHO would have the authority to be able to enforce that here in the United States, on whatever pretext they want. They don't have to show data. They could do this. Bachmann summed up the danger in one line: "What this does, bottom line is that it creates a platform for global governance through the WHO," she said. (israelnews365.com 5/11)

## US Dollar at Risk as Saudi Arabia Considers Chinese Yuan for Oil.

The status of the US dollar, including as the world's reserve currency, depends on its dominance of global markets, especially the oil market, where 80% of sales are done in US dollars. If Saudi Arabia were to break the tradition of pricing its oil in dollars it would dramatically affect the US dollar's status and potentially the entire US economy. (prophecynewswatch.com 4/28)

## Another Fuel Crisis on The Horizon? East Coast Diesel Stockpiles Hit Record Low.

D (for Diesel)-Day quickly approaches, though it might already be here as US East Coast distillate inventories plunge to a record low, according to new government data.

Total U.S. distillate inventories have sunk to levels not seen since the last financial crisis. (prophecynewswatch.com 5/9)

## US Mortgage Rates Rise; 30-Year at 5.27%, Highest Since 2009.

The increases came in the week preceding the widely anticipated action by the Federal Reserve, announced Wednesday, to intensify its fight against the worst inflation in 40 years by raising its benchmark interest rate by a half-percentage point and signaling further large rate hikes to come. The Fed's move, its most aggressive since 2000, will bring higher costs for mortgages as well as credit cards, auto loans and other borrowing for individuals and businesses. (Associated Press 5/5)

### Satanic Temple Asks Boston to Fly Flag After Court Ruling.

The Satanic Temple is requesting to fly a flag over Boston City Hall after the US Supreme Court this week ruled the city violated the free speech rights of a conservative activist seeking to fly a Christian flag outside the downtown building. The Salem-based group on Tuesday tweeted a copy of its request to raise a flag to mark Satanic Appreciation Week from July 23-29. The application filed

online with the city's property management department doesn't provide any details about what the flag would look like or what the week-long celebration entails. (afa.net 5/4)

### DHS With Chinese Drones Creates First Totally Surveilled US City.

*Chula Vista*, inside San Diego's metropolitan area, the second largest city, home to some 275,000 residents, has made the history books. Chula Vista hasn't cured cancer or discovered perpetual energy; instead, their mark on history will be a dark one as they become the first city in America to be completely monitored by spy drones.
